DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims depend from claim 1, which has been canceled.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perego, EP 1,083,56. A1 (Perego).
5. Perego teaches a holder for a computer readable storage medium having a planar shape (Figure 1). The holder has a thickness of less than 5 mm (see paragraph [0035]). More than one medium can be attached to the card (paragraph [0008]).
6. Perego does not teach the specific dimensions of the holder, however, making the holder a specific size would have been obvious to a person having ordinary skill in the art, since such a modification would have involved a mere change in the size of a

component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPQ 1955).

Response to Arguments

7. Applicant's arguments filed 21 June 2006 have been fully considered but they are not persuasive. Applicant argues that a change in size may be held as patentable, and states that the ability to hold a computer readable storage medium in ones wallet is a change in function. However, as is understood from the amended claims, the computer readable storage medium is not part of the invention. The claims are directed to the holder alone. Applicant cites *Ex parte Luan Tran et al.* but no copy of this was received.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
